Welcome	Welcome to System Update.
Get new updates	You can use this tool to search for new updates for your computer, review them, then select the ones you want to download and install.
Install deferred updates	Select Schedule updates in the left pane to download and install updates automatically or receive notifications when updates are available.
Advanced	View installation history shows the status, version, and dates of the updates you already installed.
Schedule updates	You can also select to download updates but defer installation until a more convenient time. Select Install deferred updates for installing the deferred updates.
View installation history	In addition, you can "hide" updates so that they do not show up in subsequent searches; yet have the ability to restore the hidden updates if you ever need them. Go to the Restore hidden updates for restoring the hidden updates.
Restore hidden updates	Click Next to Get new updates.
	Note: Some of the updates depends on certain Windows components. Ensure that your Windows operating system is most up-to-date by running Windows Updates. <u>Click here to learn more</u> .

8. Click "Reboot Now" to reboot the machine to complete the BIOS installation. The machine will also automatically reboot in 5 minutes.

Lenovo S	ystem Update Paragraph IS Styles IS E
	Your computer will reboot in 5 minutes.
	The installed updates will restart your computer. If you have already saved your work, click "Reboot now" and your computer will restart immediately. If not, minimize this dialog and save your work before the computer restarts automatically.
	IMPORTANT: Do not put your computer in sleep or hibernate mode, or close the computer lid as this could corrupt the updates and damage your system.
	4:47
	Reboot now

Note:

The machine may reboot multiple times during the BIOS flashing. Do not interrupt the installation or unplug the ac adapter. The machine will automatically reboot and boot into Windows when the update is complete.

9. To check if the update is completed successfully, search "System Information" in the windows search box and click on the "System Information" app.
